

Cogiscan and Siemens PLM Software, represented by EP-TeQ in the Nordic and Baltic countries, are partnering up to provide a complete manufacturing software solution to enable Industry 4.0 for Electronic Manufacturers.

Cogiscan is leading [Track, Trace and Control \(TTC\) solutions](#) provider for the electronics manufacturing industry. Their solutions include material control, traceability and TTC analytics to achieve significant improvements in visibility, quality and productivity. Siemens PLM Software is a world-leading provider of [product lifecycle management](#) and [manufacturing operations management](#) software for all industries, including the out-of-the-box SIMATIC IT Unicam eMES solution for Electronic Manufacturing. Together, Cogiscan and Siemens will help companies realize innovation by optimizing their processes, from planning and development through manufacturing, production and support.

Cogiscan has the largest selection of machine interfaces due to their unique partnerships with all major equipment vendors. SIMATIC IT Unicam makes use of this proven technology to provide all the specific material control functions while collecting complete and accurate data from every machine and process.

'We are very proud to partner with a leading manufacturing solutions provider such as Siemens. This announcement is aligned with our mission to enable seamless factory automation through collaboration with leading equipment and software providers,' states Vincent Dubois, Cogiscan co-founder.

'Siemens PLM Software is committed to creating partnerships to help enhance the end-user experience of our customers. We are pleased to work with Cogiscan to provide open, integrated solutions that help to improve the productivity of our mutual customers,' says Andrew Swiecki, Head of Partner Processes and Software & Technology Partners, Siemens PLM Software.'

'Cogiscan-Siemens is a very strong partnership and the right solution to many things concerning traceability, data collection, etc., says Arne Fast Hansen, sales responsible for Cogiscan and

Siemens PLM Software at EP-TeQ. 'Both suppliers have been on the market for years, and both have a thorough knowledge of electronics.'

Cogiscan was founded in 1999 and is headquartered in Bromont, Quebec. Since its foundation, Cogiscan has attained several international patents for TTC hardware & software and won multiple awards.

Siemens PLM Software is a business unit of Siemens Digital Factory Division with headquarter in Plano, Texas. It has over 15 million licensed seats and more than 140,000 customers worldwide.

EP-TeQ A/S has a unique combination of know-how, tools and machines for all electronics processes - Design, Production and Quality Assurance, enabling us to assist you throughout your investment process: Before - by working with you on the requirement specification and configuration. During - by helping you select the required tools/machines and training. After - by providing you with service and support in order to ensure optimum quality and reliability of your production.
