

Find a first-class alternative  
to your test probe supplier!

Stilling, 13 June 2017

ECT has introduced a New "Cross-Reference tool" to help customers and distributors enter a competitor part number and cross reference it with an ECT part number. Please click on the below link and follow the below instructions to test it out for yourselves.

ECT will continually be adding competitor part numbers to the tool to keep it up to date.

Click on this link: <http://ect-cpg.com/cross-reference-tool>

**How to use the Cross-Reference tool:**

1. Enter the part number that you want to convert in the box.
2. A drop-down list will open below. Select the part number from the list.
3. The "Competitor Part Number" will appear and the ECT Equivalent Part Number. When applicable, an Alternate ECT Number will also appear.
4. Click on the ECT part number to get specifications such as CAD files and data sheets.
5. Contact EP-TeQ on +45 87480608 or [sales@ep-teq.com](mailto:sales@ep-teq.com) to place an order.

Enter Part Number:	<input type="text"/>
Competitor Part Number:	
ECT Equivalent Part Number:	
Alternative ECT Equivalent:	

## Notes

- ECT equivalents are based on best fit and may not be exact. Please compare specifications to ensure compatibility.
- When selecting POGO® series probes, consider using LFRE™ series probe for extended life.
- Loading the conversion tool for the first time may take a few seconds.
- If you are having difficulty searching for your part number, please contact Michael Vester on +45 20983738 or [mv@ep-teq.com](mailto:mv@ep-teq.com).
