This year the event will finally again be a physical conference taking place November 30th and December 1st at the nice Radisson Blu Scandinavia Hotel, located in the very city center of Gothenburg, Sweden. The Keynote speaker this year is Mr. Peter Thorngren, Technology and Strategy Leader at Volvo Group introducing us to “Testing and observability in mechatronic autonomous systems. Why fast development loops using Build, Measure and Learn in so critical and Fun”!

The full program for the two exciting days is ready, so please mark your calendar if you have not done this yet and help us in exceeding the number of attendees of about 70 test professionals at the last 3 events in both Estonia, Denmark and in Finland.

NTF TestForum - registration

The 2 day NTF TestForum is the yearly major event for Test professionals in the Nordic Countries and Baltic States. The participants are the industry’s key persons, international vendors of test and measurement equipment and solutions as well as test engineers and managers in the Nordic Baltic area. The Test Forum event offer technically relevant presentations on methodology, tools, modules/ instruments, available technology and best practice in combination with good networking opportunities. You can register for the event here: <https://testforum.nemtilmeld.dk/2/> - please register and book your room before November 12th in order for this particular hotel to guarantee a room for you.

About NTF

Nordic Test Forum (NTF) was established during TestForum 2001. A group from the Norwegian electronic industry had just completed a two-year project on Production Test, and the participants wanted to maintain the network. Besides, the British Industry Test Forum was present at the conference, and a similar organization could achieve the needs of the electronic industry.

The objective of NTF is to facilitate a forum where test engineers and other skilled personnel within test of electronic may exchange experiences, ideas and other knowledge with relevance to the technological field of test for the electronic industry in the Nordic Countries and Baltic States. Presently, the main field of interest for NTF is production test of printed circuit boards and systems, but we want to be open-minded.

The NTF board arranges open meetings with specific topics expected to be of interest for the members. In addition to these meetings, the board is also responsible for the planning of TestForum, an annual conference, usually held in November.

Membership of NTF is FREE of charge (still)!

Are you involved in production test, validation test, and inspection of electronics, and your professional work is related to activities in the Nordic & Baltic area as a test professional, design engineer, manufacturer, supplier of solutions, consultant, or similar? We encourage you to register as a member of Nordic Test Forum.

Details and important dates are available on website: <http://www.nordictestforum.org>
